

DNA Extraction Services

Greenarray Genomics Research and Solutions offers DNA extraction services.

DNA extraction can be used for studying the genetic causes of disease and for the development of diagnostics and drugs. It is also essential for carrying out forensic science, sequencing genomes, detecting bacteria and viruses in the environment and for determining paternity.

Green array uses column based method for DNA isolation.

The sample types that we accept are

- Tissue
- Blood
- Product of Conception
- Formalin-Fixed Paraffin-Embedded (FFPE) tissue

We also provide two-year storage facilities of extracted samples with the proper temperature conditions to maintain integrity of the DNA samples.

About Greenarray

Green Array is a molecular diagnostic company. We offers diagnosis of infectious diseases, genetic testing and healthcare information to improve health and wellness. Our goal is to provide high quality affordable and accessible services.
